Please be advised that Hillsborough County Registry of Deeds will be required to upgrade its computer system and introduce a new search product in the near future. This change is mandated by the vendor's inability to support the technology format currently used by nhdeeds and will impact all counties currently served by that platform.

The current Connor and Connor search system software for a number of reasons, including but not limited to;

1. The developers of system are retired.
2. Was designed when cyber security issues were not heard of.

The new computer software system is called AVID and the new search product is called Laredo (subscription base search). Both are maintained by our current vendor, Fidlar Technologies.

As the process moves along, please check our website for updates.

I appreciate your support and any questions as the Registry moves to protect the land records of Hillsborough County.

Thank you.
